

# 7-STAR<sup>\*</sup>

**7" Inch TFT LED LCD Screen Monitor  
Digital 800W\*RGB\*480H (DC9-36V)**

## LCD700

# 7-STAR<sup>\*</sup>

## Features:

### **7 INCH TFT/LED LCD MONITOR:**

With 7" big screen to show you the image from the camera, providing better visual effects than 4.3"/3.5" monitor.

Support 800\*480 pixels, digital module has higher resolution and clearer picture than analog module. The color of digital module can be more realistic than analog module.

Working perfectly with car DVD, VCD, GPS, camera, STB, satellite receiver, and other video equipment.

The screen could be adjustable by rotating the support stand to view different angle. For easy installation and stand alone.
